

CVD SILICON CARBIDE® ...

...ENGINEERED TO PERFORM™

RESISTIVITY VS TEMPERATURE

Controlled resistivity grades of CVD SILICON CARBIDE excel in high temperature ($>1500^{\circ}\text{C}$), wear and chemical resistance performance. Controlled resistivity CVD SILICON CARBIDE is available in two grades.

SC-002 Low Resistivity Grade ($<1 \Omega\text{cm}$)
SC-003 High Resistivity Grade ($>1,000 \Omega\text{cm}$)
